- Customizable Product container and Image class name for custom themes.
- Multi-store view support.

Ultimate Guide for Magento 2 Image Flipper

Introducing the Magento 2 Image Flipper Extension, an innovative solution that enhances your product display with interactive image flips. This extension allows you to showcase multiple flip effects when customers hover over the product images, adding a dynamic and engaging element to your online store.

- Easy Configuration: Setting up the image flip effect is a breeze with the module's user-friendly backend settings. Simply navigate to the backend configuration, and you'll be able to customize and set the desired flip effect for your product images effortlessly.
- Multiple Image Flip Effects: With the Magento 2 Image Flipper Extension, you can choose from a range of flip effects to make your product images come to life. Whether it's horizontal flips, vertical flips, rotational flips, or any other captivating effect, you have the flexibility to select the one that best suits your brand and product aesthetics.
- Seamless Integration: The Magento 2 Image Flipper Extension seamlessly integrates with your existing store theme and design. You can easily adjust the class names for the product container and image, ensuring a cohesive and consistent look throughout your store.
- Flexibility for Customization: Whether you have a custom theme or require specific image roles for your products, this extension offers flexibility in customization. You can set your own image roles when editing the product, ensuring the correct images are displayed during the flip effect.

How to install the extension

1. Install via composer (recommend)

- Enable maintenance mode **php bin/magento maintenance:enable**
- Run the command **composer require mageinic/image-flipper**

- Run the command **php bin/magento module:enable MageINIC_Core MageINIC_ImageFlipper**
- Run the command **php bin/magento setup:upgrade** to install the extension
- Run the command **php bin/magento cache:clean** to clean the cache
- Disable maintenance mode **php bin/magento maintenance:disable**
- Check the store environment if everything is working properly. If, at any point, the store displays an error, check the Magento logger for more details.

2. Upload via ZIP/Archive

- Back up your store's database and web directory
- Download the extension zip file and extract the zip file
- Transfer the **MageINIC** folder to the Magento 2 **app/code/** directory on the server
- Enable maintenance mode **php bin/magento maintenance:enable**
- Run the command **php bin/magento module:enable MageINIC_Core MageINIC_ImageFlipper**
- Run the command **php bin/magento setup:upgrade** to install the extension
- Run the command **php bin/magento cache:clean** to clean the cache
- Disable maintenance mode **php bin/magento maintenance:disable**
- Check the store environment if everything is working properly. If, at any point, the store displays an error, check the Magento logger for more details.

Extension Configuration

To configure the extension configuration, Please go to **Stores** → **Settings** → **Configuration** → **MageINIC** → **Product Image Flipper**.

Image Flipper Settings
